### AWARDS

**Most Likely to Become A Startup**  
LambdaSchool Hackathon Jan. 2018  
The Arbie application won 'Most Likely to Become A Startup' after completing a 24hr Hackathon.

### ACTIVITIES

#### LambdaSchool Hackathon

Participant  
2018

School-Wide 24hr Hackathon Event where we were teamed up to build a fully-functional app in 24hrs based on a list of application ideas.

### PROJECTS

#### CAPSTONE: Leveld (Advertising Network)

Feb. 2018 to Current

**Source:** <https://github.com/Leveld/LAN-Frontend>

**APPLICATION:** <http://Leveld.Network>

**DEMO VIDEO:** <https://www.youtube.com/watch?v=M0PLQ0dkDzY>

**ROLE:** Front-End UI/UX, Data Flow, Security

**STACK:** MongoDB ExpressJS ReactJS + Redux NodeJS

Leveld is an Advertising Network designed on the idea of embracing a 1 on 1 connection with the Advertiser and the Publisher, giving a more reliable and a more transparent Business Relationship.

#### HACKATHON: Arbie (Cryptocurrency Arbitrage Finder)

Jan. 2018 to Current

**Source:** <https://github.com/Gemini-Hackathon/arbie>

**ROLE:** Back-End Databases & Front-End Data Flow

**STACK:** MongoDB ExpressJS ReactJS NodeJS

A Lambda School Hackathon Event where our main goal was to create a fully-functional application within 24 hrs with a team of four developers that ranged in different skill sets.

The Application was designed to find the profit (Arbitrage) between different Cryptocurrency exchanges finding the lowest and highest exchange price per currency and calculated the difference in prices to find the estimated profit the client would receive if they were to buy and sell at that given time.

#### INKBook (Tattooing Network)

Winter 2018 to Current

**Source:** [Private Repo Link On Request](#)

**ROLE:** Full-Stack

**STACK:** MongoDB ExpressJS ReactJS + Redux NodeJS

The idea behind this application was to develop a central hub for Tattoo Shops, Artist, and Clients to build upon the business connection and provide detailed information about the artist/shop. The application would allow verified shops to add artists which would then verify the artist as a Professional.

#### Portfolio

June 2018 to Current

**Source:** <https://github.com/Track7Dev/Portfolio>

**ROLE:** Full-Stack

**STACK:** MongoDB ExpressJS ReactJS + Redux NodeJS

This Application is designed to showcase main projects i have contributed to or developed while showcasing feature and component concepts.

#### Fayetteville Tattoo Company

Winter 2018 to Current

**Source:** <https://github.com/Fayetteville-Tattoo-Company>

**ROLE:** Full-Stack

**STACK:** MongoDB ExpressJS ReactJS NodeJS

This application is designed for a client's business to showcase merchandise, events , and and business related Information.
